

UV-C Disinfection Product Catalogue

How UV Works

Microbe

The molecular structure of the DNA is broken down rendering the microbe harmless.

Ultraviolet Light

DNA

UV-C Puck Light

UV-C Puck Light

Features

- Slim and portable design.
- Double safety insurance with rotating switch and gravity sensor.
- Disinfection in 20 seconds, kill 99.9% of bacteria.
- Easy installation with magnet plate on the back.

Rotating 36° to turn the light on

Product Description

Model No	PT-UVC2-2W
Voltage	5V
Power	2.5W
Wavelength	275nm+400nm
Lamp	LED
Controls	Rotating Switch+Gravity Sensor
Timer	4 minutes
Sanitizing time	20-120 Seconds
Sanitizing efficiency	99.9%
Battery	750mA
Charging interface:	Micro USB

Operation Instruction

- Two Steps to turn on the light
- 1.Turning the light side down.
 - 2.Rotating the upper cover.

UV-C Puck Light Size

UV Works

The diagram illustrates the process of UV disinfection. On the left, a colorful, textured sphere represents a microbe, with the word "Microbe" written below it. Four purple arrows point towards the microbe from the top left. A large, light blue cone of light emanates from the microbe, pointing towards the right. On the right, a blue and white DNA double helix is shown, with the word "DNA" written below it. Four purple arrows point towards the DNA from the top right, indicating the breaking down of the microbe's molecular structure.

Microbe

The molecular structure of the DNA is broken down rendering the microbe harmless.

DNA

UV-C Disinfection Box

UV-C Disinfection Box

Features

- Big volume, ideal for sanitizing 20 devices at a time.
- 20 seconds UV-C light cycle kills 99% of germs and bacteria.
- Built-in timer, 0~30 minutes adjustable.
- Built-in door trigger switch.
- High quality aluminum box.

Operation Instruction

- 1.Put objects into the box
- 2.Close the lid, the door trigger switch is connected
- 3.Press the timer switch on the top of the box to tart the UV-C lamp
- 4.Sanitizing finish in 20 seconds

Product Description

Model No	ST-UVC5-5W
Voltage	5V
Power	4W
Wavelength	253nm
Lamp	CCFL
Controls	Door trigger switch
Timer	0-30 minutes
Sanitizing time	20-120 Seconds
Sanitizing efficiency	99.9%
Battery	5V,2000mA
Charging interface:	Micro USB

Size

How UV Works

The molecular structure of the DNA is broken down rendering the microbe harmless.

UV-C Light Panel

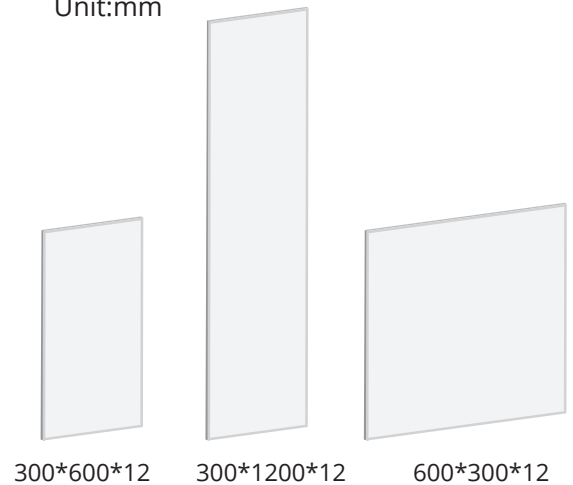

UV-C Light Panel

Features

- Ultra-thin design- 12mm.
- White Light + UVC light integrated.
- Disinfection in 20 seconds, kill 99.9% of bacteria.
- Two power supplies (one for white light, one for UVC).

Size

Unit:mm

Installation Guide

Product Description

Model No	LP-UVC3-3060	LP-UVC3-6060	LP-UVC3-30120
Watt (W)	25W+10W(UVC)	40W+20W(UVC)	40W+20W(UVC)
Dimension (mm)	300*600*12	600*600*12	300*1200*12
Input Voltage (V)	AC 100-240V		
LED Model	SMD 2835, 0.2W,30-32lm Ra:80/UVC SMD3535 270-280nm		
LED Qty (PCS)	144+18(UVC)	192+36(UVC)	216+36(UVC)
Installation	Surface mounted		

Safety Instructions

1. Read and save all notices, warnings and safety instructions received with equipment.
2. Avoid exposure to direct or reflected germicidal ultraviolet rays. They are harmful to eyes and skin.
3. Do not alter the construction or design. Do not remove safety labels or devices.
4. Do not use equipment for other than its intended purpose, as described in the equipment manual.
5. Do not operate equipment if the power cord and/or plug are damaged, or if any other damage to the unit is visible or suspected.
6. Utility power must match power requirements listed on the unit label.
7. Equipment should be protected from the elements and from temperatures below freezing.
8. Do not exceed equipment's maximum rated flow capacity and/or operating pressure.

Omni Directional UV-C Disinfecter

Why Use Continuous UVC to Disinfect?

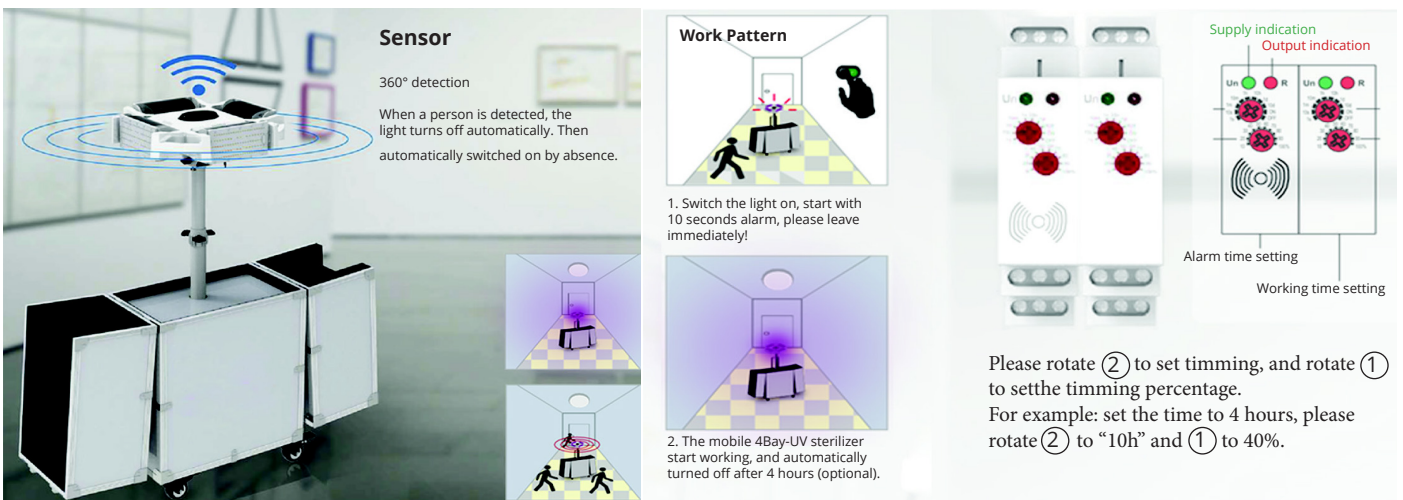

UVC's wavelength is germicidal—meaning it is capable of inactivating microorganisms, such as bacteria, viruses and fungi. This quality makes UVC an effective, environmentally-friendly and chemical-free way to eradicate dangerous microorganisms in any environment.

Omni Directional UV-C Disinfecter

Features

- Spectral Wavelength: 200-280nm
- Mobile & Single Placement
- Motion Sensor Protection
- Flexible Target Disinfection Area
- Easy to transport and store

Product Description

Wattage	50W	100W	150W	200W
Limiting altitude	1.5m			
Horizontal rotation	X-360°			
Vertical rotation	Y-180°			
Size	500x300x1030mm

UV-C Cannon

Features

- Designed for big area sanitizing, apply to 30 ~200m² area
- Ten minute UV C light cycle kills 99% of germs and bacteria
- Built in timer, 0 ~120 minutes adjustable.
- Use high efficiency electrodeless fluorescent tube.
- Stainless frame on a base with wheels, easy to move.

Operation Instruction

1. Move the light into target area.
2. Connect to main power.
3. Close all windows and doors.
4. Select the disinfection time and press the power button.

Size

Unit:cm

Product Description

Model No	LC-UVC10 1000W
Voltage	110 / 220V
Power	100W
Wavelength	253nm
Lamp	Electrodeless fluorescent tube
Controls	12s delay switch
Timer	0-120 minutes
Sanitizing time	20-120 Seconds
Sanitizing efficiency	99.9%
Effective range:	30~200m ²

Safety Instruction

1. Read and save all notices, warnings and safety instructions received with equipment.
2. Avoid exposure to direct or reflected germicidal ultraviolet rays. They are harmful to eyes and skin.
3. Do not alter the construction or design. Do not remove safety labels or devices.
4. Do not use equipment for other than its intended purpose, as described in the equipment manual.
5. Do not operate equipment if the power cord and/or plug are damaged, or if any other damage to the unit is visible or suspected.
6. Utility power must match power requirements listed on the unit label.
7. Equipment should be protected from the elements and from temperatures below freezing.
8. Do not exceed equipment's maximum rated flow capacity and/or operating pressure.

Smart PIR Sensor, Safety is Top Priority

It will stop sterilization when people are detected by sensor within 3 meters. The UVC light will continue to work in UVC model when nobody is detected and cumulative working time is 60 minutes.

UV-C Cabinet Light

Dual models, One-click switch, Time-delayed startup

Two modes: Standard mode, UVC mode, One-click switch function. UVC mode will start working after 30S if press the switch. UVC mode will automatically shut down after 60 minutes sterilization.

Standard mode

Standard mode

It will be in normal lighting mode after connecting to power. Its CRI is more than 80, which restore natural color.

UVC mode

UVC mode

It will automatically start working after 30S if press the button. The sterilization mode will last for 60 minutes.

UV-C Cabinet Light

Detail

Product Description

Standard Mode

Art. No	UB-UVC-LS6W	UB-UVC-LS9W	UB-UVC-LS12W
Power Consumption	6W	9W	12W
Color Temperature	3000K		
Luminous Flux	500lm	800lm	1000lm
Dimension	305x38x13mm	457x38x13mm	610x38x13mm
Shell Material	Al+silica glass		
Input Voltage	AC100-240V		
LED Driver	Plug-in 12W

UV-C Disinfection Module

- Powerful UV-C module, 50W.
- 20 seconds UV-C light cycle kills 99.9% of bacteria.
- Two Built-in fans for heat dissipation.

Product Description

Model No	HD-UVC2-50W
Voltage	AC110-240V
Power	50W
Wavelength	270-280nm
Lamp	UV-C LED
Controls	Mechanical Switch
Sanitizing time	20-120 Seconds
Sanitizing efficiency	99.9%

Size

Rigid UV-C LED Bar

- Solid design, 2mm thick aluminum PCB.
- UVC LED + Blue LED integrated.
- Disinfection in 20 seconds, kill 99.9% of bacteria.
- 4 different currents and powers for option.

Product Description

Model No	LS-UVC4-30	LS-UVC4-60	LS-UVC4-100	LS-UVC4-150
Current	30mA	60mA	100mA	10mA
Power	UVC LEDs: 5W Blue LEDs: 3.3W	UVC LEDs: 10W Blue LEDs: 3.3W	UVC LEDs: 16.8W Blue LEDs: 3.3W	UVC LEDs: 25W Blue LEDs: 3.3W
Voltage	24V			
LED	21 UVC LED (3535 Package), 42 Blue LED (2835 Package)			
Wavelength	UVC LED: 265-280nm, Blue LED: 395nm			
PCB Dimension	L600*W20*H2 mm			
PCB Material	Aluminum			

Size

Flex UV-C LED Strip

Features

- Slim design, 8mm width flexible PCB
- 3737 UV-C LED
- Disinfection in 20 seconds, kill 99.9% of bacteria

Product Description

Model No	FS-UVC5-3W
Voltage	24V
Power	3W/m
LED	12 LED/m (3737 Package)
Wavelength	270-280 nm
PCB Width	8mm
Cutting Lenth	166.66mm
Sanitizing time	20-120 Seconds

Size

PIR Motion Sensor Switch

Model No	PS101
Voltage	12/24V
Max Load	60W
Sensor Type	PIR Motion sensor
Detecting Angle	140°
Detecting Distance	3m
Delay time	15s (customized)
Material	Plastic
Color	White/Black
IP Rating	IP20
Wire	AWG#22
Mounting	Recessed
Accessories	None

Model No	PS102
Voltage	12/24V
Max Load	60W
Sensor Type	PIR Motion sensor
Detecting Angle	140°
Detecting Distance	3m
Delay time	15s (customized)
Material	Plastic
Color	White/Black
IP Rating	IP20
Wire	AWG#22
Mounting	Surface/Recessed
Accessories	None
